Salinity Aid – Soil Wetter

**PRINCIPAL FUNCTIONING AGENTS:**

Proprietary Blend of Salinity Aids and Soil Wetters.....	22%
Inert ingredients .....	78%
<b>TOTAL .....</b>	<b>100%</b>

Read label before use.  
Keep container tightly closed.  
Keep only in original container.  
Avoid breathing spray.  
Wash thoroughly after handling.  
Do not eat, drink or smoke when using this product.  
Wear protective gloves, protective clothing, eye protection.

**FIRST AID**

**Call a poison control center or doctor immediately for treatment advice. Have the product container with you when calling a poison control center or doctor, or going for treatment.**

**IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses if present, after the first 5 minutes, then continue cautiously rinsing eye.

**IF ON SKIN OR CLOTHING:** Take off contaminated clothing and wash it before reuse. Wash skin with plenty of soap and water for several minutes.

**IF SWALLOWED:** Unless advised otherwise by a poison control center or doctor, have person rinse mouth with water, if able. Do not give anything by mouth to an unconscious person.

**IF INHALED:** If breathing is difficult, remove person to fresh air and keep at rest in a position comfortable for breathing. If person is not breathing, call 911 or an ambulance, and then give artificial respiration, preferably mouth to mouth if possible.

**CAUTION: KEEP OUT OF REACH OF CHILDREN**

**NET CONTENTS: 2.5 U.S. Gallons (9.46 L)**

## GENERAL INFORMATION

**GS NJECT** is a versatile salinity aid/irrigation surfactant combination. **GS NJECT** contains a chelating agent that helps move salts out of the soil profile and into lower layers. **GS NJECT** improves the infiltration of irrigation solutions into the soil profile and increases the availability of water and nutrients within the root growing zone. By improving percolation and chelating salts, **GS NJECT** begins to rehabilitate soils that have been damaged by salinity build-up. **GS NJECT** may be used on all turf including golf courses, athletic fields, commercial and residential lawns, sod farms and in ornamental and nursery operations.

## DIRECTIONS FOR USE

**GS NJECT** can be used all through the growing season and will not discolor or harm turf when applied according to label directions. For best results, **GS NJECT** should be applied before the plants show signs of stress.

**GS NJECT** will not interact with most tank additives or active formulations. To increase performance in hard water or where water quality is not ideal, use of **GS NJECT** more often is recommended. Different conditions such as water hardness, temperature and humidity, soil type, and other factors will affect the application frequency and the amount of product necessary to properly treat the soil and achieve optimum results.

## APPLICATION RATES

Irrigation injection systems	Begin with 20 ounces per acre/1.5 L per hectare. May be increased by 4 ounces per acre until adequate penetration is achieved if required
Conventional ground spraying equipment	Use the same rates and rate changes as above. Use at least 60 gallons of water per acre to dilute before applying

Apply **GS NJECT** once every four weeks just before and when plants are growing. Applications that are more frequent may be necessary if adverse conditions such as extremely saline or extremely water resistant soils are present.

## STORAGE AND DISPOSAL

**Storage:** Store in a cool well-ventilated place. Keep in original container tightly closed. Do not reuse empty container. Do not store with food, feed, or other material to be used or consumed by humans or animals. Do not contaminate water supplies. For optimal storage, store between 40° and 90° F.

**Disposal:** Do not contaminate water, food or feed by storage or disposal. Dispose of contents in container to an approved waste disposal facility in accordance with all federal, state and local regulations. Triple rinse (or equivalent) adding rinse water to application tank. Offer container for recycling or dispose of in a sanitary landfill or by other procedures approved by local regulations.

**WARRANTY:** Seller warrants that this product consists of the ingredients specified and is reasonably made for the purpose stated on this label when used in accordance with directions under normal conditions of use. No one other than Seller is authorized to make any warranty, guarantee or direction concerning this product. Because the time, place, rate of application and other conditions of use are beyond the Seller's control, Seller's liability from handling, storage and use of the product is limited to replacement of product or refund of purchase price.
